

Austedo in UAE

The MoHAP named-patient coordination pathway — indicative 2026

NEUROLOGY · TARDIVE DYSKINESIA

The clinical situation

Austedo (deutetrabenazine) is an FDA-approved oral deuterated VMAT2 inhibitor indicated for adults with tardive dyskinesia and for chorea associated with Huntington disease. Manufactured by Teva. Standard dosing titrates weekly from 6 mg twice daily to an effective range of 12-48 mg per day (divided dosing; Austedo XR offers once-daily), with CYP2D6 dose adjustment; ambient-storage oral tablet.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your treating neurologist or psychiatrist confirms AIMS-rated TD diagnosis or HD chorea and documents prior exposure history and response.
- 2 Treating centre confirmed.** A UAE tertiary neurology/movement-disorder centre in Abu Dhabi, Dubai, or Sharjah accepts the case.
- 3 MoHAP named-patient application.** Clinical rationale, patient reference, and product details are filed with the MoHAP NPP team; local emirate health authority coordination as required.
- 4 US-side sourcing & logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner; ambient-temperature shipment.
- 5 Arrival & administration.** Patient begins titration under physician guidance; AIMS/chorea scoring reassessed at 4-8 weeks.

Indicative economics

Reference US cash-pay range: USD 8,500–10,000 per 30-day supply. MoHAP documentation, logistics, and concierge coordination are incremental. Full transparent quote at intake.

Indicative first-dose timing

7–14 days from a complete MoHAP application to first-dose delivery, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody. **Documentation.** Regulatory package for your physician and MoHAP review. **Logistics.** Ambient-temperature shipment coordination. **Concierge case lead.** Named point of contact for family and physician through the full process. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating physician.
