

Farxiga in India

The CDSCO named-patient coordination pathway — indicative 2026

CARDIOMETABOLIC · SGLT2 INHIBITOR

The clinical situation

Farxiga (dapagliflozin) is an FDA-approved oral selective SGLT2 inhibitor indicated to improve glycaemic control in type 2 diabetes, reduce cardiovascular death and heart-failure hospitalisation in HFrEF and HFpEF, and slow CKD progression. Manufactured by AstraZeneca. Standard dosing is 5-10 mg once daily; ambient-storage oral tablet.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your treating cardiologist, endocrinologist, or nephrologist documents indication (T2DM, HF, or CKD) and eligibility.
- 2 Treating centre confirmed.** An Indian tertiary centre in Mumbai, Delhi, Bengaluru, or Chennai accepts the case and writes the prescription.
- 3 CDSCO named-patient application.** Clinical rationale, patient reference, and product details are filed under CDSCO's personal-import pathway; Form-10/Form-12 as applicable.
- 4 US-side sourcing & logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner; ambient-temperature shipment.
- 5 Arrival & administration.** Patient begins oral once-daily dosing under physician monitoring; HbA1c, BNP, or eGFR recheck per indication.

Indicative economics

Reference US cash-pay range: USD 550–650 per 30-day supply. CDSCO documentation, logistics, and concierge coordination are incremental. Full transparent quote at intake.

Indicative first-dose timing

7–14 days from a complete CDSCO application to first-dose delivery, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody. **Documentation.** Regulatory package for your physician and CDSCO review. **Logistics.** Ambient-temperature shipment coordination. **Concierge case lead.** Named point of contact for family and physician through the full process. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating physician.
