

Kerendia in UAE

The MoHAP named-patient coordination pathway — indicative 2026

CARDIOMETABOLIC · NONSTEROIDAL MRA

The clinical situation

Kerendia (finerenone) is an FDA-approved oral nonsteroidal selective mineralocorticoid receptor antagonist indicated to reduce the risk of sustained eGFR decline, ESRD, cardiovascular death, and heart-failure hospitalisation in adults with CKD associated with type 2 diabetes. Manufactured by Bayer. Standard dosing is 10 or 20 mg once daily based on eGFR/potassium, with periodic monitoring; ambient-storage oral tablet.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your treating nephrologist or cardiologist confirms CKD/T2DM eligibility, reviews eGFR and potassium, and writes the prescription.
- 2 Treating centre confirmed.** A UAE tertiary centre in Abu Dhabi, Dubai, or Sharjah accepts the case.
- 3 MoHAP named-patient application.** Clinical rationale, patient reference, and product details are filed with the MoHAP NPP team; local emirate health authority coordination as required.
- 4 US-side sourcing & logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner; ambient-temperature shipment.
- 5 Arrival & administration.** Patient begins oral once-daily dosing under physician monitoring; eGFR and potassium rechecked at 4 weeks, then periodically.

Indicative economics

Reference US cash-pay range: USD 650–750 per 30-day supply. MoHAP documentation, logistics, and concierge coordination are incremental. Full transparent quote at intake.

Indicative first-dose timing

7–14 days from a complete MoHAP application to first-dose delivery, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody. **Documentation.** Regulatory package for your physician and MoHAP review. **Logistics.** Ambient-temperature shipment coordination. **Concierge case lead.** Named point of contact for family and physician through the full process. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating physician.
