

Mekinist in Bahrain

The NHRA named-patient coordination pathway — indicative 2026

ONCOLOGY · BRAF-MUTANT CANCERS

The clinical situation

Mekinist (trametinib) is an FDA-approved oral selective MEK1/2 inhibitor dosed 2 mg once daily in combination with dabrafenib for BRAF V600-mutant melanoma, adjuvant melanoma, metastatic NSCLC, anaplastic thyroid cancer, and solid tumours with BRAF V600E mutation. Manufactured by Novartis. Requires documented BRAF V600 mutation testing and coordinated initiation with the BRAF-inhibitor combination partner.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your treating oncologist confirms BRAF V600 mutation status and documents a written clinical rationale and prior line history.
- 2 Treatment facility confirmed.** A Bahraini oncology centre (Manama tertiary facility) accepts the case and sets the combination-therapy plan.
- 3 NHRA named-patient application.** Clinical rationale, patient reference, product details, and chain-of-custody plan are filed with the National Health Regulatory Authority.
- 4 US-side sourcing & logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner, booked to your initiation date.
- 5 Arrival & administration.** The facility receives the product and initiates under your oncologist's care; ongoing cycles dispensed per the combination protocol.

Indicative economics

Reference US cash-pay range: USD 11,000–13,000 per 30-day supply. Combination partner (dabrafenib), NHRA documentation, logistics, and concierge coordination are incremental. Full transparent quote at intake.

Indicative first-dose timing

7–14 days from a complete NHRA application to first-dose delivery, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody. **Documentation.** Regulatory package for your physician and NHRA review. **Logistics.** Temperature-monitored shipment coordination. **Concierge case lead.** Named point of contact for family and physician through the full process. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating oncologist.
