

Repatha in Saudi Arabia

The SFDA named-patient coordination pathway — indicative 2026

CARDIOLOGY · HYPERCHOLESTEROLAEMIA

The clinical situation

Repatha (evolocumab) is an FDA-approved fully human monoclonal antibody to PCSK9 that increases hepatic LDL-receptor availability, indicated for primary hypercholesterolaemia (including HeFH and HoFH) and to reduce MI, stroke, and coronary revascularisation in adults with established cardiovascular disease. Manufactured by Amgen. Standard dosing is 140 mg SC every two weeks or 420 mg SC once monthly; refrigerated storage, patient-administered auto-injector or Pushtronex pump.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your treating cardiologist or lipidologist documents LDL-C trajectory on maximally-tolerated statin ± ezetimibe and confirms PCSK9-inhibitor eligibility.
- 2 Treating centre confirmed.** A Saudi tertiary cardiology centre in Riyadh, Jeddah, or Dhahran accepts the case and writes the prescription.
- 3 SFDA named-patient application.** Clinical rationale, patient reference, product details, and cold-chain plan are filed; SFDA NPP electronic submission.
- 4 US-side sourcing & logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner; temperature-monitored 2-8°C shipment.
- 5 Arrival & administration.** Patient self-administers SC at home after nurse training; LDL-C recheck at 4-8 weeks, then quarterly.

Indicative economics

Reference US cash-pay range: USD 500–600 per 2-week supply (one auto-injector). SFDA documentation, cold-chain logistics, and concierge coordination are incremental. Full transparent quote at intake.

Indicative first-dose timing

7–14 days from a complete SFDA application to first-dose delivery, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody. **Documentation.** Regulatory package for your physician and SFDA review. **Logistics.** Temperature-monitored cold-chain shipment coordination. **Concierge case lead.** Named point of contact for family and physician through the full process. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating cardiologist.
