

Skyrizi in Saudi Arabia

The SFDA named-patient coordination pathway — indicative 2026

IMMUNOLOGY · PSORIASIS, PSA, CROHN'S, UC

The clinical situation

Skyrizi (risankizumab-rzaa) is a subcutaneous anti-IL-23 monoclonal antibody FDA-approved for moderate-to-severe plaque psoriasis, psoriatic arthritis, Crohn's disease, and ulcerative colitis. Manufactured by AbbVie. Dosing follows an indication-specific induction and maintenance calendar (commonly 150 mg at weeks 0, 4, then every 12 weeks for psoriasis; IV induction for Crohn's/UC then SC maintenance). Pre-treatment workup covers TB, viral hepatitis, and vaccination status per FDA labeling.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your dermatologist, rheumatologist, or gastroenterologist documents indication, severity, prior therapies, and Skyrizi rationale.
- 2 Baseline screening.** TB, viral hepatitis, and vaccination status are completed and documented per FDA labeling.
- 3 SFDA named-patient application.** Physician or hospital pharmacy files clinical rationale, patient reference, dosing calendar, and cold-chain chain-of-custody plan.
- 4 US-side sourcing & cold-chain logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner with validated 2–8°C cold-chain shipment and temperature logging.
- 5 Arrival & first dose.** Dispensing pharmacy releases product against the prescription; your physician administers induction per labeling and sets the maintenance calendar.

Indicative economics

Reference US cash-pay range: USD 17,000–21,000 per quarterly 150 mg maintenance dose of Skyrizi (drug-only reference; induction calendar priced separately; Reserve Meds provides a transparent delivered quote at intake).

Indicative first-dose timing

7–14 days from a complete SFDA application to first dispensation, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody from AbbVie authorised distribution.

Documentation. Physician kit tailored to SFDA review. **Logistics.** Validated 2–8°C cold-chain shipment with temperature logging. **Concierge case lead.** Named point of contact for family and physician through the case arc. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating physician.
