

Tavalisse in UAE

The MoHAP named-patient coordination pathway — indicative 2026

HEMATOLOGY · CHRONIC ITP (SYK INHIBITION)

The clinical situation

Tavalisse (fostamatinib) is an FDA-approved oral spleen tyrosine kinase (SYK) inhibitor indicated for chronic immune thrombocytopenia (ITP) in adults with insufficient response to previous treatment. Manufactured by Rigel. Dosed orally twice daily with dose adjustment based on platelet response and blood pressure. Stored at controlled room temperature.

The pathway, 5 steps

- 1 Consultation & clinical rationale.** Your treating hematologist confirms chronic ITP with prior-therapy failure and documents the clinical rationale; baseline blood pressure and liver panel recorded.
- 2 Monitoring plan confirmed.** A UAE hematology clinic or tertiary hospital accepts the case for CBC, BP, and LFT monitoring.
- 3 MoHAP named-patient application.** Clinical rationale, patient reference, product details, and supply plan filed with the UAE Ministry of Health and Prevention.
- 4 US-side sourcing & logistics.** Reserve Meds coordinates product through our US-licensed DSCSA-compliant specialty wholesale partner.
- 5 Arrival & dispensing.** The clinic receives the supply; twice-daily oral dosing with BP and platelet monitoring, refills coordinated on a rolling basis.

Indicative economics

Reference US cash-pay range: USD 11,000–13,000 per 30-day supply. Logistics, MoHAP documentation, and concierge coordination are incremental. Full transparent quote at intake.

Indicative first-dose timing

7–14 days from a complete MoHAP application to first-dose delivery, once cohort intake opens. Indicative — not guaranteed.

Reserve Meds's role

Sourcing. US-licensed specialty wholesale partner, DSCSA chain-of-custody. **Documentation.** Regulatory package for your physician and MoHAP review. **Logistics.** Temperature-monitored shipment coordination. **Concierge case lead.** Named point of contact for family and physician through the full process. **We are a coordinator** — not the prescriber, not the dispensing pharmacy. All clinical decisions remain with your treating hematologist.
